

MDC Family disease heredity

2017-03-09

Contents:	Family disease heredity according to question 65 (version 1), questions 124 to 133 (version 2) or questions 86 to 95 (version 3) in the questionnaire. The accounted diseases are: cancer, heart infarction, stroke and diabetes (only version 1).
# lines:	119 649 records of 28 459 individuals
# variables:	11
Misc:	Versions 2 and 3 of the questionnaire did not contain questions about diabetes in relatives. Data of diseases in children are available from version 1 in MDC Family heredity, but from version 2 and 3 in MDC Questionnaire (see variables sd134a to sd134c).

List of variables

Name	Variable label	Type	Format	Value label	Male	Female	Ver
lopnrMKC	Baseline sequence number in MDCS (Numeric). <i>Remarks:</i> original variable name is [lopnr] (in Bodycomp [seqno]).	Numeric	F5		46 621	73 028	123
udatum_sj	Questioning date. <i>Remarks:</i> The variable 'udatum_sj' ought to be identical with the variable 'udatum' in MDC baseline questionnaire, however the date differ for 32 individuals, as a consequence the suffix '_sj' has been added to the variable name.	Date	SDATE10		46 621	73 028	123
ver	Version of the questionnaire form. <i>Remarks:</i> Three different questionnaire forms were used during the study period as given below Version 1: 1991 03 18 – 1992 03 10 Version 2: 1992 03 11 – 1994 09 26 Version 3: 1994 09 27 – 1996 09 30 The family heredity questions were identical in versions 2 and 3, but a few questions were different in comparison with version 1.	Numeric	F2	1 = Version 1 23 = Version 2 or 3	46 621	73 028	123
slaktska	Kind of kinship to the relative.	String	A2	BA = Child (only ver 1) BR = Brother F = Father HB = Half brother (only ver 23) HS = Half sister (only ver 23) M = Mother SY = Sister -8 = Did get the question but did not respond	46 621	73 028	123
fdat_17	Birth date of the relative (YYYYMMDD). <i>Remarks:</i> Records with known birth year but unknown month and day have been coded YYYY0000, records with known birth year and month but unknown day have been coded YYYYMM00. The original values of the variable have partly been corrected and edited, the new variable is called 'fdat_17' (March 9, 2017). Some relatives have doubtful or probably erroneous date or year of birth.	Numeric	F8	-9 = Did not get the question -8 = Did get the question but did not respond	43 108	68 803	123

Name	Variable label	Type	Format	Value label	Male	Female	Ver
lever	Is the relative alive? <i>Remarks:</i> The original wording in the questionnaire is 'Död' (version 1) and 'Är i livet' versions 2 and 3).	Numeric	F1	1 = Alive 2 = Dead 3 = Don't know (only ver 1) -9 = Did not get the question -8 = Did get the question but did not respond	45 546	71 804	123
dodar	Year of death of the relative (YY). <i>Remarks:</i> Some relatives have doubtful or probably erroneous year of death.	Numeric	F2	-9 Did not get the question	19 684	29 129	123
cancer	My relative has had/have cancer.	Numeric	F1	1 = Yes 2 = No 3 = Don't know -8 = Did get the question but did not respond	46 534	72 907	123
infarkt	My relative has had/have heart infarction.	Numeric	F1	1 = Yes 2 = No 3 = Don't know -8 = Did get the question but did not respond	46 507	72 891	123
slag	My relative has had/have stroke.	Numeric	F1	1 = Yes 2 = No 3 = Don't know -8 = Did get the question but did not respond	46 498	72 877	123
socker	My relative has had/have diabetes.	Numeric	F1	1 = Yes (only ver 1) 2 = No (only ver 1) 3 = Don't know (only ver 1) -9 = Did not get the question -8 = Did get the question but did not respond	5 365	8 163	1
